

Independent Assurance Statement to the Management of Landsec Group plc

We have performed a limited assurance engagement on selected performance data and qualitative statements in the Physical and Social sections of the Strategic Report, the sustainability content in the 'Additional Information' section of the Landsec Group PLC ("the Group") 2018 Annual Report and Accounts and the online Landsec Performance Data Report 2018 (collectively referred to as "the Report").

Respective responsibilities

The Group's management are responsible for the collection and presentation of the information within the Report. Management are also responsible for the design implementation and maintenance of internal controls relevant to the preparation of the Report, so that it is free from material misstatement, whether due to fraud or error.

Our responsibility, in accordance with management's instructions, is to carry out a 'limited level' assurance engagement on selected data and performance claims in the Report ('the subject matter information'). We do not accept or assume any responsibility for any other purpose or to any other person or organisation. Any reliance any such third party may place on the Report is entirely at its own risk.

What we did to form our conclusions

Our assurance engagement has been planned and performed in accordance with ISAE3000 (Revised)¹ and to meet the requirements of a Type 2 assurance engagement as defined by AA1000AS (2008).² The AA1000AS (2008) assurance principles of Inclusivity, Materiality and Responsiveness have been used as criteria against which to evaluate the Report.

The procedures we performed were based on our professional judgement and included the steps outlined below:

- 1. Interviewed a selection of the Group's management** and reviewed company-level documents to understand the progress made in the area of sustainability during the reporting period and test the coverage of topics within the Report.
- 2. Conducted site visits at two sites (Bluewater and White Rose)** to understand how the sustainability agenda is being managed at the site-level.
- 3. Reviewed the Group's approach to stakeholder engagement** through interviews with employees with responsibility for managing engagement activities and review of selected associated documentation.
- 4. Reviewed the coverage of key issues within the Report** against the key issues raised in external media reports and the sustainability reports of the Group's peers, as well as the topics discussed in our management interviews, site visits and by the Sustainability Committee and other internal working groups.
- 5. Interviewed staff responsible for data reporting and carried out the following activities to review selected sustainability data:**
 - Reviewed the guidance on data reporting, key processes and quality assurance performed.
 - Selected a sample of data points from across the business and sought documentary evidence to support the data.
 - Conducted a walk-through of data reported from a sample of sites to test consolidation.
 - Reviewed any explanations provided for significant variances.
 - Reviewed the Report for the appropriate presentation of the data including limitations and assumptions.

Our review of data processes was limited to the following selected data sets:

- **Community employment:** People into jobs through the Community Employment Programme
- **Greenhouse gas emissions:** Direct GHG emissions (MtCO₂e), Indirect GHG emissions (MtCO₂e), and GHG intensity from building energy (tCO₂e/m²/ year)
- **Waste:** Waste diverted from landfill (tonnes) and percentage of waste recycled

- 6. Reviewed information or explanation about selected data, statements and assertions** regarding the sustainability performance of the Group.

The limitations of our review

Our evidence gathering procedures were designed to obtain a 'limited level' of assurance (as set out in ISAE3000 Revised) on which to base our conclusions. The extent of evidence gathering procedures performed is less than that of a reasonable assurance engagement (such as a financial audit) and therefore a lower level of assurance is provided.

Completion of our testing activities has involved placing reliance on the Group's controls for managing and reporting sustainability information, with the degree of reliance informed by the results of our review of the effectiveness of these controls. We have not sought to review systems and controls at the Group beyond those used for selected sustainability data (as presented in the table above).

We have only sought evidence to support the 2017/2018 performance data relating to the corporate commitment performance and greenhouse gas emission reporting (pp. 5-13). We do not provide conclusions on any other data from prior years or EPRA and TCFD related disclosures.

Our conclusions

Based on the scope of our review our conclusions are outlined below:

Inclusivity

Has the Group been engaging with stakeholders across the business to develop its response to sustainability issues?

- We are not aware of any key stakeholder groups that have been excluded from dialogue.
- We are not aware of any matters that would lead us to conclude that the Group has not applied the inclusivity principle in developing its response to sustainability issues.

Materiality

Has the Group provided a balanced representation of key topics concerning its sustainability performance?

- We are not aware of any key topics concerning the sustainability performance of the Group which have been excluded from the Report.
- Nothing has come to our attention that causes us to believe that the Group's management has not applied its processes for determining material issues to be included in the Report.

Responsiveness

Has the Group responded to stakeholder concerns?

- We are not aware of any matters that would lead us to conclude that the Group has not applied the responsiveness principle in considering the matters to be reported.

Completeness and accuracy of performance information

- We are not aware of any material reporting units that have been omitted from the stated scope of the company-level sustainability data.
- Nothing has come to our attention that causes us to believe that the data relating to the above topics has not been collated properly from company-level systems.
- We are not aware of any errors that would materially affect the data as presented in the Report.

How plausible are the statements and claims within the Report?

- We have reviewed information or explanation on selected statements regarding the Group's sustainability activities presented in the Report and we are not aware of any misstatements in the assertions made.

Observations and areas for improvement

Our observations and areas for improvement will be raised in a report to the Group's management. Selected observations are provided below. These observations do not affect our conclusions on the Report set out above.

- This is the first year that Landsec has fully integrated its sustainability report into the annual report and accounts with separate sustainability content on the website. The website includes more detailed data disclosure and provides illustrative examples of its sustainability activities and programmes. We note that Landsec is further developing tailored communications and communications channels aligned to the interests and needs of different stakeholder groups (e.g. customers, governments and communities).
- In its Annual Report Landsec has included references to the work it has done to understand and quantify its economic contribution to the UK as well as respond to the Task Force on Climate-related Financial Disclosures (TCFD) recommendations by reporting more information on the impact of climate change on the business. These disclosures demonstrate how Landsec is seeking to understand how it creates and protects value in the long term for a wide variety of stakeholders. One key area of value creation that hasn't yet been fully explored is social value, however we understand that Landsec is in the process of commissioning a study to better understanding the social value created through its operations.

Our independence

We have implemented measures to comply with the applicable independence and professional competence rules as articulated by the IFAC Code of Ethics for Professional Accountants and ISQC1.³ Ernst & Young's independence policies apply to the firm, partners and professional staff. These policies prohibit any financial interests in our clients that would or might be seen to impair independence. Each year, partners and staff are required to confirm their compliance with the firm's policies.

We confirm annually to the Group whether there have been any events including the provision of prohibited services that could impair our independence or objectivity. There were no such events or services in 2017/18. Our assurance team has been drawn from our global Climate Change and Sustainability Services Practice, which undertakes engagements similar to this with a number of significant UK and international businesses.
